• Programming Languages: C (Basic), Java

• Database: SQL, MySQL

• Web Technologies: HTML, CSS, JavaScript, ReactJS, NodeJS, MongoDB

• Frameworks & Tools: Material-UI, Git, GitHub, Tailwind, Bootstrap

• Core Subjects: Data Structures & Algorithms, Database Management System, OOPs

PROJECTS

Mobile App Review Analytics & Rating System 🗹

Jan 2025 - May 2025

- Built an intelligent app review analyzer using BERT-LSTM hybrid to understand user sentiment with 91% accuracy
- Created a smart feature extraction system with Mistral LLM that identifies key app features from user feedback
- Developed automated clustering to group similar features and provide data-driven insights for app developers
- Designed fair rating system using Bayesian scoring that considers feature importance beyond simple star ratings

Hospital Appointment Management System

Feb 2025 - May 2025

- Set-up a Multifunctional admin dashboard for managing appointments, doctors, services, events, and user feedback
- Implemented appointment confirmation and deletion features with real-time updates leveraging React and REST APIs
- Configured a responsive and professional UI using React Bootstrap for seamless user experience across devices.
- Utilized React Router for smooth navigation and fetch API for communicating with backend services
- Backend developed with Node.js and Express, providing secure and efficient REST endpoints

DormNest: Student Accommodation Finder

Oct 2025 - Dec 2024

- Built a platform for student housing using Java, Java Swing, JDBC and PostgreSQL.
- Completed property search, filters, and owner dashboard featuring real-time updates.
- Enabled secure authentication, listing management, and student-owner messaging
- Established a responsive UI with resizeable images and easy access navigation

EXTRACURRICULAR ACTIVITIES

- Playing Video Games
- Playing Football
- · Watching Movies
- Volunteering

LANGUAGE

- Tamil
- English
